

Installing GPStrac on Nextel Phones Updated 8-25-09

1. Delete other Java Applications
 - Press the Menu button.
 - Arrow over/down until the highlight is on “Java Apps”, press OK button.
 - Delete all Java Apps EXCEPT these:
 - Download Apps
 - Java System
 - To delete an app, arrow down until the app is highlighted
 - Press the Menu button
 - Arrow down until Deinstall is highlighted, press OK button.
 - It may prompt you with other questions... answer them so it proceeds with the deinstall function (this normally means ‘yes’ or ‘ok’ is the answer).
 - Repeat this process until all apps are removed EXCEPT for the list above.
2. Download & Install GPStrac on the phone
 - Connect Cable to Phone (phone will display ‘Device Attached’)
 - In Windows PC Software
 - Click ‘Connect to Phone’
